COUPLER

CONNECTOR

THERE ARE TWO SECTIONS TO EACH PANEL:
A LOWER SECTION, IDENTIFIED BY A LABEL
AND SCREW OUT LEVELER IN THE LEGS.
THE OTHER ONE IS THE UPPER SECTION.

1. GET TWO COUPLERS AND ONE CONNECTOR IN YOUR HAND.
2. GET TWO LOWER SECTIONS. STAND THEM UP WITH TWO EDGES TOGETHER AND IN A SHALLOW "V" INSERT ONE COUPLER IN THE TOP OF EACH OF THE SECTIONS AT THE TOUCHING EDGES.
3. NOW TAKE THE CONNECTOR AND PRESS IT OVER THE COUPLERS TO JOIN THE PANELS TOGETHER.
4. AT THE BOTTOM OF THE LEGS FASTEN THE STRAP BY WRAPPING IT AROUND THE LEGS TIGHTLY.
5. PROCEED WITH ALL THE LOWER SECTIONS UNTIL THEY ARE COMPLETE AND IN THE POSITION YOU WANT THEM.
6. NOW MOUNT THE UPPER SECTION ONTO THE COUPLERS, MATCHING UPPER TO LOWER SECTIONS. FASTEN ALL THE STRAPS TIGHTLY AND INSTALL SUPPORT BARS IF YOU NEED THEM. A SMALL LADDER OR STEP STOOL WILL PROBABLY BE NECESSARY IF YOU HAVE THE 8 FOOT MODEL UNLESS YOU ARE EXTREMELY TALL.
7. SOONER OR LATER THE TUBES THAT THE COUPLERS FIT IN WILL GET BUMPED AND PROBABLY GO OUT OF THEIR ROUND SHAPE. BE PREPARED! ALWAYS CARRY A SCREWDRIVER AND WITH A LITTLE LEVERAGE IN THE TUBE YOU CAN MAKE IT ROUND AGAIN.
