DESK / MINI DESK

Your new Pro Desk has 2 parts: The base and the top with the shelves attached. The wooden lip of the top has Velcro attached along 3 sides, which comes into contact with the sides and front of the base on the inside. If you've ordered the Desk Cover as well, the 4th side will have Velcro attached for the cover to attach to.

Stand the base up with the sides open to a 45-degree angle. Make sure the seam and label are on the inside of the desk and not showing on the outside.

Rest the front of the top on the desk base first, then fold the 2 sides in firmly. When you're looking at the desk from the front, make sure the sides are pushed in so that you don't see them protruding from the sides.

Tighten the straps on the legs for stability.
